## Experience

**Frontend Developer - Remote**                                                      Jan 2023 - Current

Perform Zone

- Created responsive and user-friendly interfaces for a large-scale job recruitment software with 67,000+ jobs using HTML, CSS, Bootstrap, JavaScript, jQuery.
- Collaborated with backend developers to integrate frontend components with backend systems, ensuring smooth data flow and optimal performance.
- Worked effectively in an agile-like environment, utilizing strong communication and collaboration skills to ensure seamless integration and completion of tasks within tight deadlines
- Utilized Git for version control, ensuring efficient code collaboration with the team's work
- Employed Docker to create containerized environments for application testing.
  .

**Frontend Developer Internship |**                                                  **Sep 2022 - Jan 2023**

Frontend Simplified

- Transformed a completely static HTML, CSS, JavaScript and React single page application into an interactive user interface using animations, transitions and carousels
- Processed API requests with Axios to dynamically represent data from a cloud server and represented it through skeleton loading states, pagination and dynamic routing
- Utilized Git version control and the GitHub interface to work and thrive in a virtual and collaborative team environment

**Freelance Frontend Developer**                                                     July 2022 - Current

Self Employed

- Delivered professional websites using HTML5, CSS3 (+ SCSS, BEM), JavaScript and React best practises
- Improved website performance by compressing, caching and lazy loading images and components
- Included SEO, responsive, multi-platform and hosting support, enabling their website to be used by any browser or device in the world
